Way Out West, Inc... materials

- We are a licensed source of DuPont™ fabrics. As a result, we have a long history using their products, often in the creation of protective hoods and clothing.
 - **DuPont™ Tyvek®**: A fabric that provides protection from air pollutants and contaminants.
 - **DuPont™ Tychem® QC**: Provides protection from light liquid splashes and often used in the automobile, petroleum, pulp and paper, food and chemical processing, pharmaceutical, and painting industries.
 - **DuPont™ Tychem® SL**: Provides protection against a wide range of chemicals and uses include PCB clean-up, waste management, and hazardous response

Way Out West, Inc... materials cont.

- Other materials we have worked with include:
 - **Anti-static materials:** Used in apparel for the computer and electronics industries
 - **Canvas:** Used for bags, pouches and bike covers
 - **Cordura®:** a high performance product resistant to tears and scuffs
 - **Duracote®:** a coated, laminated fabric available in various colors
 - **Gentex®:** Aluminized non woven material used for heat shielding, molten metal splash protective clothing, radiant heat protective clothing, and proximity fire fighting
